

FUSYON CASHMERE

Taken from the goat of the same name, cashmere wool combines exceptional properties and is known for the highest level of wear comfort. It's extremely soft and is also very effective in providing warmth. Other impressive features are its low weight, resilience and stability. It efficiently removes moisture and allows the skin to breathe.

The latest pioneering accomplishment of the UYN® brand is the fusion of finest cashmere hair with Primaloft insulation yarns in a single product. Combining exceptional softness and lightness with outstanding thermal properties, the products achieve a whole new level of comfort and functionality.
